Secretary of Transportation
Washington DC

Dear Mr Adams

I do not think you fully realize the extent of the disaster that is possible if radioactive waste is accidently leaked on the streets of New York City. Before you make a decision arrange for public hearings in New York City and obtain an environmental impact statement of the possible effect of accidental leakage and the possibility of an accident.

No one thought it was possible for two 747s to have a head on crash on take off, as occurred on the Canary Islands

Sincerely yours
Edgar Freud.
