I would like to comment on the new HOS.

I like the new HOS Better than the old E-2-1
I like the restart F-2-2
I like the extra hour of driving F 1-4
I think the sleeper Berth & off duty should be combined like in the old HOS. F-3-10

F-3-1 This no idling law is a real slap in the face. Sure I can sleep in the sleeper with temp between 40° & 65° with the truck shut off. I dont like getting up to a Ice Box or a bake oven.

Besides. cold temperature the driver has to worry about fuel jelling up, engine that won't start & freeze ups. & how can sleep when It is hot out.

The power generator sounds good. But the extra weight, up keep & cost of 5-7 000 dollars If you want us, to do this I think you should pay us. for the generator & compensate us for the weight. Our light weight keeps getting higher & heighter

I'm 57 yrs. old & an o/op & I like what I am doing. But you keep pushing us. Why do you think there is a shortage of good drivers. Wake up.

I thank you for your time & concern.
