June 14, '94

Dear Sir:

this letter is a protest against the government's proposed smoking ban. The EPA's report about secondhand smoke is not accurate or scientific, and the Congressional Research Service has called the report into question; and it is being challenged in court also. OSHA should base its regulations on sound science - not political science.

Smoking and nonsmoking sections are the norm in most areas. According to polls, two-thirds of Americans find this arrangement acceptable. Let's keep it this way!

Sincerely,

John McIntosh
