Dear Sir,

I am writing to express my strong opposition to the Indoor Air Quality Regulation now being considered.

I have several employees and many customers who enjoy smoking and I allow smoking in my store. Smoking has been allowed at this location for over 60 years, and no one has ever complained.

I cannot afford to designate a seperate smoking room with its own ventelation system. If I prohibited smoking it would lower

the productivity and morale of my employees.

The proposed regulation is unnecessary and would cause me financial hardship. It is extreme government intervention into private business and property.
