General Comment:Dear USDA-

It was a clear intent from Congress to end the slaughter of American horses for Human Consumption with the passage of the Amendment that prevents U.S. tax dollars to be spent on USDA inspection at horse slaughter facilities, on the 2006

Ag. Appropriations Bill.

It is the will of Congress, as well as thousands of Americans that March 10, 2006 be the day the horse slaughter ends in the United States.

Sincerely,

Julie Caramante
