

Comment Info: =====

General Comment: My Husband and I have raised Quarter Horses and cattle for 30 years.

There is a need for the horse slaughter plants to remain open, without that option, there is little or no salvage value in horses no longer sound for riding or unfit for breeding. There are rules in place for the humane trucking and handling at the plants. Please do NOT remove the option for the plants to hire inspectors at their expense, and thus effectively shut down these much needed facilities.
