EPA Administrator, Docket #EPA-HQ-OAR-2006-0888 Steve Johnson

Dear EPA Administrator, Docket #EPA-HQ-OAR-2006-0888 Johnson,

I was outraged to learn about EPA's proposed rule change that would undermine laws that protect air quality in "Class I" national parks, which are supposed to have the cleanest air in the country. How can you justify defying the law to allow greater emissions?

The prevention of significant deterioration program was designed to prevent air quality in Class I areas from getting worse. Yet EPA's rule would employ accounting gimmicks that open the door to more pollution. Changing this rule would degrade air in Class I areas--and have devastating effects on delicate ecosystems, wildlife, and visitor experience in national parks.

Our environment is in serious danger at this point. we need to be more intentional about caring for it, not less.

I urge you to abandon this proposal to change the rules on Class I air quality. Thank you for considering my views.

Sincerely,
Jennifer Karsner
