Docket ID number EPA-HQ-OPP-2007-0588

We have applied Magnacide to irrigation systems since 1993. This year alone we have applied over 650 gallons doing 31 applications. We have never seen damage to plants or birds in all these years of application.

We are licensed by the State of Idaho for aquatic weed control, have gone through application inspections by our Magnacide tech representative, and attended seminars sponsored by Baker Petrolite.

All of our applications will show results in 15 miles of treatment or under. We exercise extreme caution with Magnacide and follow the label for our own personal safety and the well being of others who could be affected. I know of no other herbicide that will do the job as well as Magnacide.

Sincerely

A handwritten signature in cursive script, appearing to read 'Carl McElhinney', is written over the typed name.
