WILSON IRRIGATION COMPANY
C/O KEITH STEED—PRESIDENT
3496 S. 4700 W.
WEST HAVEN, UT 84401

TO: Whom it may concern.

FROM: Wilson Irrigation Company.

MAGNACIDE (H) Herbicide has been a terrific Herbicide for our Agricultural Irrigation system. With the hot weather and the growth of Aquatic vegetation in our canals, it's a must that we have this Herbicide. We have had no complaint of using this herbicide from the people we service. There have been no reports of dead fish, birds or damage to crops that would be connected or associated with the use of the MAGNACIDE H applications. We have used MAGNACIDE H for many years now. It controls our algae problems for the six months that we have the water running. It would be most difficult to run our Irrigation Co. without the use of this product. In fact it would make it also impossible! Our Company follows the regulations and laws associated with application of this aquatic herbicide. Our wish is that we are able to continue to use the MAGNACIDE H with out any further laws or developments that would cause a disruption in servicing our canals. We truly need to continue to have this product available to us for our Irrigation system. Our stockholders are happy with the way we are able to control the weeds and algae and other Aquatic plants that would restrict the water flow. Thanks for your time.

Sincerely,

Wilson Irrigation Co.
Vern W. Holmes, Secretary
