Special Programs
Administration

400 Seventh Street, S.W.
Washington, D.C. 20590

FEB 17 2005

DOT-E 12412

EXPIRATION DATE: January 31, 2007

(FOR RENEWAL, SEE 49 CFR § 107.109)

1. GRANTEE: A & D Freight, Inc.
Okeechbee, FL

(See Appendix A to this document for a list of additional grantees)

2. PURPOSE AND LIMITATION:

- a. This exemption authorizes the discharge of liquid hazardous materials from certain UN Intermediate Bulk Containers (IBCs) and DOT Specification 57 portable tanks without removing them from the vehicle on which they are transported. This exemption provides no relief from the Hazardous Materials Regulations (HMR) other than as specifically stated herein.

- b. The safety analyses performed in development of this exemption only considered the hazards and risks associated with transportation in commerce. The safety analyses did not consider the hazards and risks associated with other uses not associated with transportation in commerce.

3. REGULATORY SYSTEM AFFECTED: 49 CFR Parts 106, 107 and 171-180.
4. REGULATIONS FROM WHICH EXEMPTED: 49 CFR § 177.834(h), in that a UN IBC or DOT Specification 57 portable tank is unloaded while on a motor vehicle, and the marking requirements in § 172.302(c).

FEB 17 2005

5. BASIS: This exemption is based on the action initiated by the Office of Hazardous Materials Safety and discussed in a letter dated May 27, 1999 and the Federal Register on June 12, 2000 [65FR36882] in accordance with § 107.121(a)(2) and the public proceeding thereon.
6. HAZARDOUS MATERIALS (49 CFR § 172.101):

Hazardous Materials Description			
Proper Shipping Name	Hazard Class/ Division	Identification Number	Packing Group
All liquid materials authorized to be shipped in metal, rigid plastic and composite UN IBCs or DOT Specification 57 portable tanks.	As appropriate	As appropriate	As appropriate

7. SAFETY CONTROL MEASURES:

a. PACKAGING - Packaging prescribed is a UN 31A, 31B, 31N, 31H1, 31H2 or 31HZ1 IBC or DOT Specification 57 portable tank.

(1) The packagings may not be manifolded together or have discharge outlets hard piped onto the vehicle.

(2) An IBC or Specification 57 portable tank that contains a liquid hazardous material of Class 3, PG II, or PG III with a flash point of less than 100 °F (38°C); Division 5.1, PG II; or Division 6.1, PG II, must conform to the outlet requirements in §§ 178.275(d)(3) or 178.345-11.

b. TESTING - Each IBC or DOT 57 portable tank must be retested and reinspected as specified in § 180.352 and § 180.605 respectively.

FEB 17 2005

c. OPERATIONAL CONTROLS -

- (1) The IBC or DOT 57 portable tank must be attended by a qualified person at all times during unloading operations. For the purposes of this requirement, "attended" and "qualified" have the meanings described in §§ 177.834(i)(3) and (4), respectively.
- (2) Hoses may not be attached to discharge outlets during transportation (movement) of the motor vehicle.
- (3) The packages may be unloaded but may not be refilled while on a motor vehicle.
- (4) Two or more materials may not be loaded on the same vehicle if any mixture of the materials would cause an unsafe condition.
- (5) Each IBC or DOT 57 portable tank must be discharged using a mechanical pump with a positive means of stopping the flow of liquid from the pump, by gravity, or by pressurizing it.
- (6) Before starting each transfer from an IBC or DOT 57 portable tank to a receiving system, the person performing the function must determine that each component of the discharge system (including hose) is of sound quality and free of leaks and that connections are secure.
- (7) A hose or associated equipment that shows signs of leakage, significant bulging, or other defects may not be used.
- (8) If the IBC or DOT 57 portable tank is unloaded using a pump, or if it is pressurized for unloading, prior to using a new or repaired transfer hose, the hose assembly (the hose and associated fittings) must be subjected to a pressure test. The pressure test must be performed at no less than the pressure the hose is expected to be subjected to during product transfer. This test must include all hose and hose fittings arranged in the configuration to be employed during transfer operations. Burst pressure of the hose must be at least four times the service pressure of the pump.

FEB 17 2005

(9) If the IBC or DOT 57 portable tank is pressurized, it must be equipped with a pressure relief device set to open at not higher than two-thirds of the test pressure or 9 psig in the case of a metal IBC.

(10) All hazardous material must be purged from the pump, if equipped, piping and the discharge hose prior to re-entering transportation. Hoses may not remain attached to the IBCs or portable tanks during transportation.

(11) Prior to refilling, each IBC and its service equipment must be visually inspected in accordance with the provisions of §§ 173.35(b) and 180.352.

(12) Prior to refilling, each DOT Specification 57 portable tank and its service equipment must be visually inspected in accordance with the provisions of § 180.605.

(13) Transportation is limited to private or contract motor vehicle.

8. SPECIAL PROVISIONS:

a. A current copy of this exemption must be maintained at each facility where the package is offered or reoffered for transportation.

b. IBCs operated under DOT-E 10429, 11537, 11646, 11769, 11911, and 12245 that are required to conform to the outlet requirements in paragraph 7.a.(2) must be retrofitted by February 28, 2006.

c. The marking requirement of § 172.302(c) is waived.

9. MODES OF TRANSPORTATION AUTHORIZED: Motor vehicle.

10. MODAL REQUIREMENTS: A current copy of this exemption must be carried aboard each motor vehicle used to transport packages covered by this exemption.

11. COMPLIANCE: Failure by a person to comply with any of the following may result in suspension or revocation of this exemption and penalties prescribed by the Federal hazardous materials transportation law, 49 U.S.C. 5101 et seq:

- o All terms and conditions prescribed in this exemption and the Hazardous Materials Regulations, 49 CFR Parts 171-180.
- o Persons operating under the terms of this exemption must comply with the security plan requirement in Subpart I of Part 172 of the HMR, when applicable.
- o Registration required by § 107.601 et seq., when applicable.

Each "Hazmat employee", as defined in § 171.8, who performs a function subject to this exemption must receive training on the requirements and conditions of this exemption in addition to the training required by §§ 172.700 through 172.704.

No person may use or apply this exemption, including display of its number, when this exemption has expired or is otherwise no longer in effect.

12. REPORTING REQUIREMENTS: Shipments or operations conducted under this exemption are subject to the Hazardous Materials Incident Reporting requirements specified in 49 CFR §§ 171.15 - Immediate notice of certain hazardous materials incidents, and 171.16 - Detailed hazardous materials incident reports. In addition, the grantee(s) of this exemption must notify the Associate Administrator for Hazardous Materials Safety -- OHMEA, in writing, of any incident involving a package, shipment or operation conducted under terms of this exemption.

Issued in Washington, D.C.:

Robert A. McGuire
Associate Administrator for
Hazardous Materials Safety

FEB 17 2005
(DATE)

Address all inquiries to: Associate Administrator for Hazardous Materials Safety, Research and Special Programs Administration, Department of Transportation, Washington, D.C. 20590.
Attention: DHM-31.

FEB 17 2005

Copies of this exemption may be obtained by accessing the Hazardous Materials Safety Homepage at <http://hazmat.dot.gov/exemptions> Photo reproductions and legible reductions of this exemption are permitted. Any alteration of this exemption is prohibited.
