

Letting trucks from Mexico freely roam around the country is insanity! I can see five years from now when American truckers are DRIVEN out of business our government will be proclaiming "Mexican truckers are doing the job American truckers won't do."

You are putting the public at serious risk not only with the dilapidated condition of Mexican trucks but also the uninspected cargo that will undoubtedly pass through.

How about drug testing?

When American's start dying from this travesty will you take responsibility for the deaths? There may be some lawyers that will hold you accountable.
