

Captain Peter Boynton
US Coast Guard
Commanding Officer
Group/MSO Long Island Sound
120 Woodward Ave.
New Haven, Ct. 06512

Dear Captain Boynton:

It is my opinion that a liquefied natural gas facility does not belong in Long Island Sound. I believe that it endangers the health and safety of the Sound and the residents surrounding it.

I further believe that this facility would limit public access and set a dangerous precedent of industrializing the Sound.

In closing I would like in writing, your position on this pressing issue.

Thank you for a response.

Yours truly

Jack Kennedy

Captain Peter Baynton,
U.S. Coast Guard

I am a concerned citizen who
believes that a LUG facility in the
Long Island sound is a dangerous and
reckless idea that will have adverse
health effects for Long Islanders and our
environment. Please help put an end to the
proposed project. A response would be
greatly appreciated.

Sincerely,
John E. Petrizzo

To whom it may concern,

As a long time resident of Long Island, I grew very fond of the natural beauty of this special place, and I have come to appreciate the beauty of our pristine sound. I strongly oppose a LNG facility in our area as I believe it to be dangerous and a serious threat to our already fragile ecosystem.

A LNG FACILITY DOES NOT BELONG ON LONG ISLAND!!

Dear Captain Boynton,

I am writing to register my opposition to the liquefied natural gas facility off of Rocky Point, NY in the Long Island Sound. I am concerned about the impact on the environment such a facility would have. I don't like the idea that it would be a private industrialized area in the middle of the sound.

Thanks very much for your help in stopping the construction of this facility.

Sincerely,

Edith Auner

Dear Captain Boynton,

This letter is in regards to the liquefied natural gas facility that is to be built off Wading River in the middle of the Long Island Sound. A facility such as this would be nothing but harmful for the Long Island Sound. Construction would endanger marine life. This area is a place where marine life is particularly active during several months of the year. construction will threaten many difference species. Shellfish and other bottom dwellers will be effected by the ditches dug for the 25 mile pipes. The exposed areas will be filled with sediment and other organic matter, which will decrease oxygen in the area. This oxygen is vital for the organisms to live. Also the facility will emit carbon dioxide which scientist and environmental activist have already informed us is the number one cause of global warming.

What I am trying to say is THE LIQUEFIED NATURAL GAS FACILITY ENDANGERS THE HEALTH AND SAFETY OF THE LONG ISLAND SOUND AND SHOULD NOT BE BUILT.

Thank you for your time.
Sincerely,

Sean Barry

To whom it may concern:

We are a resident of the island for so many years and we are very concerned about the environment that concerns Long Island and all over the country. Meaning wildlife, fishing, swimming and recreation. I feel you should look for another alternative because we dont need no pipes in the water. We have enough polution in the water and dont need any more added to it. I feel that the liquefied natural gas facility endangers the health and safety of Long Island Sound and should not be built. Liquefied natural gas facility does not belong in Long Island sound. (We dont need the rich to get richer and also we are destroying our earth.) I would appreciate it if you take this letter into consideration.

Thank you,

Frank Dross

Captain Peter Boynton,

Please be advised that as a Long Islander I am totally against the LNG Facility proposed for the Long Island Sound. These big companies are looking to put money in their own pockets and don't care about the damages that will occur to Marine life, our Air quality, and the effects of the pipe line witch will decrease oxygen in the water of the Long Island sound! The Long Island Sound is My backyard and the great South bay is my front yard! How would you like this in your back yard to look at, I don't think that you would! I ask you as Tax payer to please reconsider and reject the whole Idea!

Thank you for listening

Dear Captain Boynton,

I am writing on behalf of the Citizens Campaign to Stop Industrialization of Our Long Island Sound. As a resident of the east end of Long Island, I would be greatly affected by the continued efforts to build a natural gas facility in the middle of the sound.

Albeit, I do respect the necessity to obtain and produce natural gas, I do not believe that the middle of Long Island Sound is the best choice. If there is a planned "Public No Access Zone" it would drastically change the current ability for the commercial fishing and harvesting of shellfish industry to continue. As this is one of the oldest professions of many of the families of friends and neighbors of mine, I would be overwhelmed if this affected their heritage and income.

In addition, the Long Island Sound has long been an estuary of national significance and the environment would be devastated.

Please do not allow this to happen.

Sincerely,

A concerned citizen

Dear Captain Baynton,

I am writing to you to say I am against installing a natural gas facility in the Long Island Sound.

It does not belong there, it will endanger the health & safety of the sound & it limits public access & sets a dangerous precedent of industrializing the sound.

I would greatly appreciate hearing from you in response to my letter to inform me of your position in this matter.

Thank you for your attention.

Sincerely

Barbara Miller

It has come to my attention that there is a plan in place to construct a liquefied natural gas facility in the middle of the Long Island Sound. In addition the facility will potentially destroy marine life, restrict access to the sound for recreational purposes, and the economy of fishermen in the area. I am strongly opposed to this plan.

I am readily disappointed in Long Island Sound. Still, if oil and/or more natural bonds can be made available to the public, a previously completed public asset in the interest of their own financial gain. Should Broadway seek approval for this or a similar precedent, allowing a corporation to set limits on public access, for their own private gain.

The approval of Broadway will also set a precedent that will endanger the health and safety of the Long Island Sound and the animals and people of the area.

Please inform me of your position in writing.

Thank you,

Dear Magalie:

I am writing to voice my opinion that an LNG facility endangers the health and safety of Long Island Sound and should not be built. I have a 6 year old daughter who I care about more than anything in the world and I fear for her future. This facility would limit public access and would set a dangerous precedent for industrializing the Sound also. I feel nothing is worth endangering the public's health and welfare as well as the possibility of hurting the animals, fish, fowl, and mammals in our area. With all the possible negative affects, I feel this proposition is preposterous.

Thank you for listening.

Dear Captain Boynton:

I am very concerned having heard recently about plans for LNG facility on the Long Island Sound. I feel that a facility such as this will not be a positive move for the people on Long Island or for Marine life. Industrializing the Long Island sound will change many things on Long Island and not for the better.

Please help protect the sound and the wildlife that depend on its delicate balance. I feel that an LNG facility endangers the health and safety of the Long Island Sound and should not be built.

I respectfully request a response telling me what your position is on this issue. Thank you for your time.

Sincerely,

Nancy Swacki

Dear U.S. Coast Guard,

I have recently been brought upon the issue of building the Equipped Natural Gas Facility in the Long Island Sound. I strongly believe that building this gas facility will not be worthwhile in the long run. This facility is potentially harmful to the environment we live in. I believe that there could be another way to help and provide for our community. Destroying the sound is clearly not a way to help. Although I understand that placing a natural Gas Facility might help the L.I. communities the advantages do not overcome the effects it might have on the sound. The sound are our beaches, a place where I grew up. I think that even the slight idea of knowing that the L.I. sound could be ruined is a chance myself amongst many others that we are not willing to take. The risk of losing our sound is a risk not worth taking. The sea life that lives in our sound would be destroyed, a good percentage of shellfish amongst other marine life. Although it might bring down the price of costly gases, can you put a

JUL 11 1 REC'D

price on air quality, the protection of marine life, the safety of the sound, and the beauty of having a sound? I for one know that if anything happened to the S.I. sound it would never be the same. Our beaches and water is a main reason why our Island is such a desirable place to live on. It makes our Island. Our community has worked hard to keep this environment safe as well as a healthy working community. I strongly encourage that this Liquefied Natural Gas not be built. It endangers the health and safety of the Long Island Sound and any chance or possibility of damage to the sound is not worthwhile because our Long Island sound is irreplaceable.

Thank you,

Sincerely
