

I would like to express my dismay and concern at what I see is a growing and very dangerous problem with all the new bright and glaring headlights and foglights. I have four young children and we are fearful driving at night especially as we are being blinded everytime we come across one of these new danger vehicles. I now feel we literally are taking our chances just to drive because the intense glare impedes our driving. Also my oldest daughter was looking at a new car that had very bright extra lighting - the sales man had the audacity to say - " Yes, these new lights are blinding to other drivers - that is why we recommend you buy a car with tinted windows!" Needless to say we did not buy a car here and we bought a car with no running lights and plain old fashioned headlamps. Still it shows they know full well they are peddling dangerous vehicles. Please enact some laws to regulate this problem. I have written to my Congressman as well as to local papers and have received acknowledgement that it is a problem and that they agree it bothers them too. Please do not wait any longer to clean up this mess.
