

This new proposal does little to enhance security to the downtown DC area. GA poses a smaller threat to the city when compared to allowing trucks in the downtown streets, or backpacks on subways and buses. These have been the terrorist's tool of choice. The only aviation related terrorist tools to date have been the major air carriers' aircraft. When our privilages to fly and move freely about our cities have been restricted, is the day that Al-Qaida has won. That day is upon all of us. Don't allow further useless restrictions. Don't aprove this proposal.
