

Sirs, I am a private pilot and small aircraft owner. I fly approximately 200 hours per year for pleasure and personal transportation. I have flown across America.

The making of the current temporary ADIZ around the Washington DC area permanent makes no sense from any real security perspective that I can figure and is very disruptive, and even crippling to general aviation in that area. Please do not make this ADIZ permanent. No general aviation aircraft has ever been used in a terrorist attack and none of the ADIZ violations has ever been terrorist related. Please allow, please insure, that American general aviation pilots maintain the rights and privileges that have made this nation so great by denying the ill informed request to make this ADIZ permanent.
