From: 
James H. Rader
Staff Director, Hazardous Materials

To: Robert A. McGuire
Associate Administrator
for Hazardous Materials Safety

The Federal Railroad Administration recommends issuing the following exemption to Railway Progress Institute, Alexandria, VA. DOT-E 12905 authorizes the transportation in commerce of certain tank cars with stainless steel identification plates in lieu of stamping the tank car heads with the DOT Specification and other requirements. This exemption provides no relief from any regulations other than as specifically stated.

I have attached a proposed exemption and supportive information. If you have any further questions, please contact Francisco González, III, of my staff, at (202)493-6076.
