Dr. Clark-

I suggest that you also specifically include the SAFMC MPA closures in Alternative Suite 5. It is included in all other options except status quo.

If that Alternative (5) was selected and enacted without the MPA prohibition, then future changes in (reopening of) the shark fishery would necessitate implementation of the MPA closure measure at that time. Why not just accomplish it now, once and for all, while amending the shark plan.

Thank you,

Mac Currin
SAFMC member from NC
