**RE: AirTran Airways Service to LaGuardia, New York**

I am aware of the efforts of AirTran Airways in seeking governmental approval for direct jet service from Toledo Express Airport to LaGuardia Airport. I support the need for expansion of our Toledo commercial air service. This would be beneficial to an important market and also assist in new economic development opportunities for our region.

The New York metropolitan area remains the number two destination from the Toledo area without direct plane service. I urge you to consider the request and am confident that the direct service would be beneficial to the Toledo community and the Department of Transportation.

I appreciate your consideration.

Sincerely,

*Kevin W. Wilt*
