I am writing in response to the proposed time change from CST to EST in the Monticello area. Personally I do not feel a need to be on the same time as Somerset and Lexington. There are just 24 hours in a day and I feel we should utalize each and everyone of those hours in a productive and innovative manner. The residents of Wayne County have lived with the CST for many years and we have all prospered as well as those on EST. I also feel as though the local school system, banks, post office as well as many other offices will have to change schedules, which devoted employees have worked for many years which is unnecessary. I could give many reasons for this time change and the only one I can hear in favor of the change is that we will finally be on Somerset time. I truely think the whole world has turned BLONDE!

So I vote NO on the time change.....
