Hello,

June 24, 1999

We are writing about the time change. In Wayne County Ky. We are against it. We vote no on the time change. It would make it hard on the old people getting out to see the Doctor. In the wintertime. It would make it hard for the working people going to work having to leave so early. It would put our children in more danger getting out so early to go to school. We live 18 miles from town. Everyone doesn't live in town. All the people around here are against the time change. Most of the people cannot go to the meeting because they are sick or work at night. So we are against the time change. We want it to stay like it is. It would be a hardship on people living as far out in the country as we do. I have talked to lots of people and no one is for the time change. They want to leave it like it is.

Thank You,  
Bobby Bertram
