RE: DOCKET NUMBER 89-15

02 MAR 30 P 3:47

We were informed on March 24, 1992 that in 50 days the law would change the tint legalization from 50% to 70% for all states.

TJ's Kustom Trucks & Autos, Inc., depends on window tinting as a source of income. Window tinting is a necessity not a sport in Louisiana. These are reasons why tint our windows:

- * Saves the interior
- * Saves energy and the use of freon (ozone layer)
- * Helps keep our cars cooler from seating out in the sun
- * Protects us from the ultraviolet rays of the sun
- * Protects small children from heat which causes dehydration and exhaustion
- * Protects pets also

1 pg

We, the voters, feel that changing the window tint to 70% would be a waste of money for the consumer and a decrease in business revenues. This is not an appropriate decision for all states. In Louisiana we need 35% for driver and passenger and 20% for the side and back glass. This is to protect us and our children from the sun and heat.

Just a little note.....the factory tinted windsheilds are more than 70%.

TJ'S KUSTOM TRUCKS & AUTOS INC
