

Move about 10-15% of flights to midnite to 6 A.M. Airports are available, planes are available, price could be lower, baggage,maintenance, and ticketing could be consolidated to one service by all airlines at each terminal to lower costs during those hours. Many college age are awake till 4 or 5 A.M. now. Traffic to and from airports would not be congested. Pick-up and drop-off regulations could be eased. Airplane landing and take-off noise no worse than police and fire sirens which go on all nite in major cities. People get used to them.
