

To Whom It May Concern:

I am in direct opposition to the proposed change in hours of service. Having been a truck driver for 30 years, I know that if they change these hours, it will directly affect my family's economic status. I am all in favor of safety, and I am very much aware of the problem of truck drivers fatigue an accidents, however, I think that if we had more rest areas then truckers wouldn't have to park on off-ramps and in shopping centers. Surely this would hopefully eliminate some of the fatigue truck drivers have to suffer. If this proposal is passed, it would directly affect the United States economy because truckers couldn't make their deliveries on time, therefore freight would back-up and you would have more truckers out there trying to make their delivery dates in the time allotted. Once again, I would like to reiterate my opposition to this proposal.

Thank You,
Charles E. Jones
