RE: Proposed Smoking Regulations

I do not approve of any government's attempt to ban smoking in the workplace. There should be designated smoking areas in any workplace. Otherwise, smokers' rights are being violated continually.

OSHA has no reason to regulate in this area. Once the government has taken our right to choose to smoke, what right will they then deny us?

Smokers pay more taxes. My health insurance costs more because I'm a declared smoker. The government needs to re-investigate all the medical claims against smoking.

And if smoking is banned nationally, what happens to all the tobacco farmers the government already subsidizes?

Devote the federal government's funds and manpower to ridding us of the horrendous crime rate we're faced with.

Respectfully
