Subje Release documents explaining your decision to reject  
ct California's waiver (ouini@graffiti.net)

Dear Administrator Johnson,

Produce the explanation of denial of a request from California and 18 other states to regulate greenhouse gas emissions from automobiles.

Your agency did you a great disservice by censoring a document as if it were a secret, rather than simply stating the facts upon which you based the decision of public office that you made.

Be as open and transparent as you promised you would be during your confirmation.

Don't keep public documents from the public -- that's a paranoid tactic someone like Bush would use. Just show the evidence and process you used to support your position that California, and 18 other states, should not be granted the waiver.

Be an open and honest public servant. Release all related documents immediately.

Sincerely,

Ken Welsch  
625 Sugar Creek Lane  
North Liberty, IA 52317
