

Comment Info: =====

General Comment: The proposed changes to the FMLA are intended not for the purpose that the act was enacted but to severely limit and cripple the act itself.

The entire purpose of the act was to benefit ALL Americans and it has.

Business and labor have greatly benefit from the implementation of the act that was written by Senator Christopher Dodd who has gone on record as opposing the changes!!!! His opposition comes from his heart but also from his knowledge that everyone has been able to work within the guidelines for the betterment of ALL.

This act which is a non - cost means to insure fairness towards workers and their bosses in a fair and equitable manner. Implementation of the proposed changes will turn the act on it's head and will serve to upend the level playing field that has been in existence.

Reject the changes that have been clearly written to turn the playing field into a quagmire for workers and their bosses.
