Administrator Stephen Johnson

Dear Administrator Johnson,

I'm writing today to urge the EPA to take action immediately to acknowledge that greenhouse gases are a serious threat to public health and welfare!

US action to address global warming is seriously overdue. Too long have harmful emissions of greenhouse gases gone unregulated in this country.

I strongly urge EPA to determine that greenhouse gases endanger public health and welfare, and move forward swiftly to regulate this pollution that so gravely threatens future generations of people and wildlife.

Please do something about this problem or else our world will cease to exist.

Sincerely,
Anna Miranda
