Administrator Stephen Johnson

Dear Administrator Johnson,

I'm writing today to urge the EPA to take action immediately to acknowledge that greenhouse gases are a serious threat to public health and welfare!

US action to address global warming is seriously overdue. Too long have harmful emissions of greenhouse gases gone unregulated in this country.

I strongly urge EPA to determine that greenhouse gases endanger public health and welfare, and move forward swiftly to regulate this pollution that so gravely threatens future generations of people and wildlife.

Please, do not be swayed by lobbyists. Locally, due to lobbyists, we are having TOO MUCH SAND being dumped on our beaches to armor the bluffs for private property owners. This is filling in the finger reefs, destroying marine habitat, killing the kelp and adversely affecting surf conditions.

Global warming is a serious threat. Please do not allow the spin of corporate interests affect your better judgment and your compassion for the environmental integrity and quality of life of ourselves, our children, and future generations.

Sincerely,  
Lynn Autumn
