Dear EPA Administrator Lisa Jackson,

We're ready to take bold action on limiting carbon dioxide pollution from vehicles. Please grant California a waiver and allow states to take innovative steps towards solving the climate crisis.

As you in Congress must realize, we are about 30-40 years late in getting started on reduction of carbon emissions, even though our scientists assured us it was a growing and continuous threat to the ozone. Please, for the sake of our children and grandchildren, start the process now....time is of the essence.
