Dear EPA Administrator Lisa Jackson,

We're ready to take bold action on limiting carbon dioxide pollution from vehicles. Please grant California a waiver and allow states to take innovative steps towards solving the climate crisis.

Setting forth the initiative of the waiver to set motor vehicle global warming pollution control standards is without any objections, if any, crucial to be done and it is upon the State of California to be granted such, due to the responsibilities we have as Americans, and because it is morally correct.
