

**DEPARTMENT OF ENERGY****10 CFR Chs. II, III, and X****48 CFR Ch. 9****Semiannual Regulatory Agenda****AGENCY:** Department of Energy.**ACTION:** Notice of semiannual regulatory agenda.

**SUMMARY:** The Department of Energy (DOE) has prepared and is making available its portion of the semiannual Unified Agenda of Federal Regulatory and Deregulatory Actions (Agenda), pursuant to Executive Order 12866 "Regulatory Planning and Review," 58 FR 51735, and the Regulatory Flexibility Act, 5 U.S.C. 601 *et seq.*

**FOR FURTHER INFORMATION CONTACT:** For further information about any particular item on the agenda, please contact the individual listed under that item. For further information on the agenda in general, please contact: Diana L. Dean, Room 6E-078, Forrestal Building, 1000 Independence Avenue SW., Washington, DC 20585, (202) 586-7440.

**SUPPLEMENTARY INFORMATION:** The Agenda is a Governmentwide compilation of upcoming and ongoing regulatory activity taking place over the next 12 months, including a brief description of each rulemaking and a timetable for action. The Agenda also includes a list of regulatory actions completed since publication of the last Agenda. The Department of Energy's portion of the Agenda includes regulatory actions called for by the Energy Policy Act of 2005, the Energy Independence and Security Act of 2007, and programmatic needs of DOE offices.

The Internet is the basic means for disseminating the Agenda and providing users the ability to obtain information from the Agenda database. DOE's entire spring 2009 agenda can be accessed online by going to: [www.reginfo.gov](http://www.reginfo.gov). Agenda entries reflect the status of activities as of approximately April 30, 2009.

Publication in the **Federal Register** is mandated by the Regulatory Flexibility Act (5 U.S.C. 602) only for Agenda entries that require either a regulatory flexibility analysis or periodic review under section 610 of that Act. Included in this Agenda are two energy conservation standards rulemakings that require regulatory flexibility analyses: Residential Electric and Gas Ranges and Ovens and Microwave Ovens, and Commercial Clothes Washers; and Commercial Refrigeration Equipment.

Issued in Washington, DC, on March 10, 2009.

**NAME:** Eric J. Fygi,  
*Acting General Counsel.*

## The 71 Regulatory Agendas

## Departmental and Others - Final Rule

Title	Regulation Identifier Number
Freedom of Information Act	<a href="#">1901-AA32</a>
Radiation Protection of the Public and the Environment	<a href="#">1901-AA38</a>
Economic Development Transfers of Real Property	<a href="#">1901-AA82</a>
Coordination of Federal Authorizations for Siting of Electric Transmission Facilities	<a href="#">1901-AB18</a>
Advanced Technology Vehicles Manufacturing Incentive Program	<a href="#">1901-AB25</a>
Loan Guarantees for Projects That Employ Innovative Technologies	<a href="#">1901-AB27</a>

## Energy Efficiency and Renewable Energy - PreRule

Title	Regulation Identifier Number
Energy Efficiency Standards for Clothes Dryers and Room Air Conditioners	<a href="#">1904-AA89</a>
Energy Efficiency Standards for Battery Chargers and External Power Supplies	<a href="#">1904-AB57</a>
Determination for External Power Supplies (Non-Class A)	<a href="#">1904-AB80</a>
Energy Conservation Standards for Residential Clothes Washers	<a href="#">1904-AB90</a>

## Energy Efficiency and Renewable Energy - Proposed Rule

Title	Regulation Identifier Number
Energy Efficiency Standards for Pool Heaters and Direct Heating Equipment and Water Heaters	<a href="#">1904-AA90</a>
Energy Efficiency Standards for General Service Fluorescent Lamps and Incandescent Lamps	<a href="#">1904-AA92</a>
Energy Efficiency Standards for Refrigerated Bottled or Canned Beverage Vending Machines	<a href="#">1904-AB58</a>
Test Procedure Waiver Requirements for Manufacturers of Consumer Products and Certain Industrial Equipment, and Additional Prohibited Acts	<a href="#">1904-AB65</a>
Energy Conservation Standards for Small Electric Motors	<a href="#">1904-AB70</a>
Test Procedures for Fluorescent Lamp Ballasts (Standby and Off Mode)	<a href="#">1904-AB77</a>
Test Procedures for Microwave Ovens (Standby and Off Mode)	<a href="#">1904-AB78</a>
Energy Efficiency Standards for Residential Refrigerators and Freezers	<a href="#">1904-AB79</a>
Inclusion of Electric Drive Vehicles in the Alternative Fuel Transportation Program	<a href="#">1904-AB81</a>
Energy Conservation Standards for New Federal Buildings	<a href="#">1904-AB82</a>
Energy Efficiency Standards for Commercial Heating, Air Conditioning, and Water Heating Equipment	<a href="#">1904-AB83</a>
Test Procedures for Walk-In Coolers and Walk-In Freezers	<a href="#">1904-AB85</a>
Test Procedures for Metal Halide Ballasts	<a href="#">1904-AB87</a>
Test Procedures for Residential Clothes Washers	<a href="#">1904-AB88</a>
Energy Conservation Program for Consumer Products: Test Procedure for Residential Furnaces and Boilers	<a href="#">1904-AB89</a>
Renewable Fuel Infrastructure Grants	<a href="#">1904-AB91</a>
Test Procedures for Residential Refrigerators and Freezers	<a href="#">1904-AB92</a>
Energy Efficiency Standards for Commercial Clothes Washers	<a href="#">1904-AB93</a>

Test Procedures for Residential Central Air Conditioners and Heat Pumps	<a href="#">1904-AB94</a>
Test Procedures for Pool Heaters and Direct Heating Equipment and Water Heaters	<a href="#">1904-AB95</a>
Energy Conservation, Fossil Fuel-Energy Reduction, and Sustainable Design Standards for New Federal Buildings	<a href="#">1904-AB96</a>

## Energy Efficiency and Renewable Energy - Final Rule

Title	Regulation Identifier Number
Rulemaking To Adopt a Definition of Household	<a href="#">1904-AB52</a>
Certification, Compliance, and Enforcement Requirements for Consumer Products and Certain Commercial and Industrial Equipment	<a href="#">1904-AB64</a>
Test Procedures for Electric Motors	<a href="#">1904-AB71</a>
Test Procedures for General Service Fluorescent Lamps, General Service Incandescent Lamps, and Incandescent Reflector Lamps	<a href="#">1904-AB72</a>
Production Incentives for Cellulosic Biofuels	<a href="#">1904-AB73</a>
Amendments to Weatherization Assistance Program for Low-Income Persons	<a href="#">1904-AB84</a>

## Energy Efficiency and Renewable Energy - Long-term Action

Title	Regulation Identifier Number
Determination for High-Intensity Discharge Lamps	<a href="#">1904-AA86</a>
Energy Conservation Standards for Residential Central Air Conditioners and Heat Pumps	<a href="#">1904-AB47</a>
Energy Conservation Standards for Fluorescent Lamp Ballasts	<a href="#">1904-AB50</a>
Test Procedures for Clothes Dryers and Room Air Conditioners (Standby and Off Mode)	<a href="#">1904-AB76</a>
Energy Conservation Standards for Walk-In Coolers and Walk-In Freezers	<a href="#">1904-AB86</a>

## Energy Efficiency and Renewable Energy - Completed Action

Title	Regulation Identifier Number
Energy Conservation Standards for Residential Electric and Gas Ranges and Ovens and Microwave Ovens, and Commercial Clothes Washers	<a href="#">1904-AB49</a>
Energy Efficiency Standards for Commercial Refrigeration Equipment	<a href="#">1904-AB59</a>
Federal Procurement of Energy Efficient Products	<a href="#">1904-AB68</a>
Amendment To Codify Energy Conservation Standards and Related Definitions Prescribed in the Energy Independence and Security Act of 2007	<a href="#">1904-AB74</a>
Test Procedures for Battery Chargers and External Power Supplies (Standby and Off Mode) and Multiple Simultaneous Output External Power Supplies	<a href="#">1904-AB75</a>

## Office of General Counsel - Final Rule

Title	Regulation Identifier Number
Standards of Ethical Conduct for Employees; Exemption From Post-Employment Restrictions for Communications Furnishing Scientific or Technological Information	<a href="#">1990-AA31</a>
Inflation Adjustment of Civil Monetary Penalties	<a href="#">1990-AA32</a>

## Office of General Counsel - Completed Action

Title	Regulation Identifier Number
Procedural Rules for DOE Nuclear Activities	<a href="#">1990-AA30</a>

## Office of Procurement and Assistance Policy - Proposed Rule

Title	Regulation Identifier Number
Rescission of Obsolete Property Management Regulations	<a href="#">1991-AB73</a>
DEAR--Price Anderson Amendments	<a href="#">1991-AB75</a>
Investment Policy Required for Qualified Defined Benefit Pension Plans	<a href="#">1991-AB80</a>
Changes to DEAR Subchapter A To Conform With the FAR	<a href="#">1991-AB81</a>
Changes to DEAR Subchapter B To Conform to the FAR	<a href="#">1991-AB83</a>
Changes to DEAR Subchapter C To Conform to the FAR	<a href="#">1991-AB84</a>
Changes to DEAR Parts 908 and 945 To Conform to the FAR	<a href="#">1991-AB86</a>
Changes to DEAR Subchapter D To Conform to the FAR	<a href="#">1991-AB87</a>
Changes to DEAR Subchapter E To Conform to the FAR	<a href="#">1991-AB88</a>
Changes to DEAR Subchapter F To Conform to the FAR	<a href="#">1991-AB89</a>
Changes to DEAR Subchapter G To Conform to the FAR	<a href="#">1991-AB90</a>
Changes to DEAR Subchapter I To Conform to the FAR	<a href="#">1991-AB91</a>

## Office of Procurement and Assistance Policy - Final Rule

Title	Regulation Identifier Number
Security Considerations--Background Checks	<a href="#">1991-AB71</a>
Financial Assistance Rules and Procedures for Financial Assistance Appeals	<a href="#">1991-AB77</a>
Technical Amendments to DEAR To Correct Errors and Update Organizational References	<a href="#">1991-AB79</a>
Intellectual Property Update	<a href="#">1991-AB82</a>

Title: Freedom of Information Act

Abstract: The Freedom of Information Act (FOIA), as amended, permits any person to request access to agency records. DOE has promulgated a regulation at part 1004 of title 10 of the Code of Federal Regulations to implement the FOIA. DOE will

revise its FOIA regulations to reflect current procedures for processing requests for information that are submitted to the Agency, to ensure compliance with the Electronic Freedom of Information Act Amendments of 1996, and to make the regulation more user friendly.

Title: Radiation Protection of the Public and the Environment

Abstract: This action would add a new 10 CFR 834 to DOE's regulations establishing a body of rules setting forth the basic requirements for ensuring radiation protection of the public and environment in connection with DOE nuclear activities. These requirements stem from the Department's ongoing effort to strengthen the protection of health, safety, and the environment from the nuclear and chemical hazards posed by these DOE activities. Major elements of the proposal include a dose limitation system for protection of the public; requirements for application optimization (As Low As is Reasonably Achievable, ALARA) process; requirements for liquid discharges; reporting and monitoring requirements; and residual radioactive material requirements.

Integrate New EPA Guidance	11/00/2009	
Final Action	10/00/2010	

Additional Information: The Environmental Protection Agency (EPA) is considering revising the Federal Guidance for

Radiation Protection of the Public. This Presidential-level guidance would refine the radiation protection and dose limitation framework for the public, and may include numerical Radiation Protection Goals (i.e., dose limits). Because it is DOE's preference to be consistent with Federal radiation protection policy, the Department is adjusting the schedule for part 834 in anticipation of revised Federal Guidance and will issue the rule following EPA action on the guidance. This will allow DOE to be consistent with the most current Presidential-level guidance upon its release. EPA's schedule for issuing the Federal Guidelines is currently tentative, therefore DOE cannot project a date for the next action on this rulemaking.

Title: Economic Development Transfers of Real Property

Abstract: This action establishes procedures for indemnifying and disposing of real property by sale or lease at the Department's defense nuclear facilities for the purpose of permitting economic development. It also establishes procedures for reporting actions to Congress, informing those acquiring the property of the availability of indemnification for injury to people or property from releases or threatened releases of hazardous materials, requesting indemnification, and making claims for indemnification. All comments received on the interim final rule have been reviewed and will be considered in the final rule.

Title: Coordination of Federal Authorizations for Siting of Electric Transmission Facilities

Abstract: Subsection 216(h) of the Federal Power Act (FPA) requires the Department of Energy (Department) to act as lead agency for purposes of coordinating all applicable Federal authorizations and related environmental reviews as may be required under Federal law in order to site transmission facilities. Subsection 216(h)(7)(A) further authorizes the Department to issue any regulations necessary to implement the provisions of section 1221(a) of Energy Policy Act of 2005 and FPA 216, including provisions providing for pre-application mechanisms to facilitate streamlining applicable Federal authorizations. Pursuant to this authority, the Department intends to promulgate regulations to facilitate the coordination of such permits, special use authorizations, certifications, opinions, or other approvals necessary to site transmission facilities. The Department notes that it has delegated to the Federal Energy Regulatory Commission certain of the Department's authorities under FPA section 216(h) and that the Commission has promulgated regulations concerning how it will carry out that authority. 71 FR 69440.

Title: Advanced Technology Vehicles Manufacturing Incentive Program

Abstract: This rulemaking will implement the Advanced Technology Vehicles Manufacturing Incentive Program authorized by section 136 of the Energy Independence and Security Act of 2007, as amended. Section 136 of the Energy Independence and Security Act of 2007 provides for loans and grants to automotive manufacturers and component suppliers for costs associated with the re-equipping, expanding, and establishing of manufacturing facilities in the United States to produce advanced technology vehicles and qualifying components that provide improvements in fuel economy performance beyond certain specified levels and engineering integration performed in the United States for such vehicles and components.

Title: Energy Efficiency Standards for Battery Chargers and External Power Supplies

Abstract: In addition to the existing general definition of "external power supply," the Energy Independence and Security Act of 2007 (EISA 2007) defines a "Class A external power supply" and sets efficiency standards for those products. EISA 2007 directs DOE to publish a final rule to determine whether the standards set for Class A external power supplies should be amended. EISA 2007 also requires DOE to issue a final rule prescribing energy conservation standards for battery chargers, if technologically feasible and economically justified.

Title: Energy Efficiency Standards for Pool Heaters and Direct Heating Equipment and Water Heaters

Abstract: The Energy Policy and Conservation Act, as amended, establishes initial energy efficiency standard levels for many types of major residential appliances and generally requires DOE to undertake two subsequent rulemakings, at specified times, to determine whether the existing standard for a covered product should be amended. This is the initial review of the statutory standards for pool heaters and direct heating equipment. This is the second review for water heaters.

Title: Energy Efficiency Standards for General Service Fluorescent Lamps and Incandescent Lamps

Abstract: The Energy Policy and Conservation Act (EPCA), as amended, establishes initial energy efficiency standard levels for fluorescent lamps and incandescent reflector lamps. EPCA also requires DOE to undertake two subsequent rulemakings to determine whether the standard for a covered product should be amended. This is the first review of the standards for

fluorescent and incandescent lamps. Previously, this rulemaking had considered energy conservation standards for general service incandescent lamps, however the Energy Independence and Security Act of 2007 established standard levels for general service incandescent lamps and modified spectrum general service incandescent lamps which take effect between 2012 and 2014. DOE is therefore no longer considering these lamps in this rulemaking.

Title: Test Procedure Waiver Requirements for Manufacturers of Consumer Products and Certain Industrial Equipment, and Additional Prohibited Acts

Abstract: Since DOE codified test procedures for consumer products and certain industrial products, some products have been introduced that the test procedures do not clearly address. Currently, manufacturers can petition DOE for a waiver when the manufacturer believes the test procedure does not evaluate the product in a manner that reflects the product's true energy consumption. This rule will establish a methodology for ensuring compliance with applicable test procedures where there is no waiver in effect.

Title: Energy Conservation Standards for Small Electric Motors

Abstract: The Energy Policy Act of 1992 amended the Energy Policy and Conservation Act to provide that the Secretary of Energy prescribe testing requirements and energy conservation standards for those small electric motors for which the Secretary determines that standards would be technologically feasible and economically justified, and would result in significant energy savings. As a result of DOE's analysis, on July 10, 2006 (71 FR 38799), the Secretary made such a determination for small electric motors. This rulemaking will determine whether it is appropriate to establish energy conservation standards for small electric motors.

Title: Energy Efficiency Standards for Commercial Heating, Air Conditioning, and Water Heating Equipment

Abstract: The Energy Policy and Conservation Act (EPCA) established Federal energy conservation standards that generally correspond to the levels in ASHRAE Standard 90.1, as in effect on October 24, 1992 (ASHRAE Standard 90.1-1989), for each type of covered equipment listed in section 342(a) of EPCA. For each type of equipment, EPCA directed that if ASHRAE Standard 90.1 is amended, DOE must adopt an amended standard at the new efficiency level in ASHRAE Standard 90.1, unless clear and convincing evidence supports a determination that adoption of a more stringent level as a national standard would produce significant additional energy savings and be technologically feasible and economically justified.

Title: Energy Efficiency Standards for Commercial Clothes Washers

Abstract: The Energy Policy and Conservation Act (EPCA) requires DOE to determine whether the existing standards for commercial clothes washers should be amended. Commercial clothes washers were previously included in a rulemaking with residential electric and gas ranges and ovens and Microwave ovens. On October 17, 2008, DOE published a NPRM for these products (73 FR 62034). Commenters subsequently alleged certain data problems affecting DOE's rulemaking analyses. DOE's preliminary assessment suggests that these concerns may be valid, thereby necessitating additional, supplemental rulemaking analyses. DOE is separating the commercial clothes washers energy conservation standard from the cooking products rulemaking and plans to issue standards for commercial clothes washers by the statutory deadline.

Title: Test Procedures for Residential Central Air Conditioners and Heat Pumps

Abstract: The Energy Independence and Security Act (EISA) of 2007 amends the Energy Policy and Conservation Act (EPCA) to require that any final rules establishing or revising a standard for a residential product adopted after July 1, 2010 incorporate standby and off mode energy use. In addition, EISA amends EPCA to allow the Secretary to consider the establishment of separate standards by geographic region for residential air conditioners and heat pumps. In a related rulemaking, DOE is scheduled to issue energy conservation standards for residential air conditioners and heat pumps no later than June 2011. DOE is reviewing the test procedures for these products.

Title: Certification, Compliance, and Enforcement Requirements for Consumer Products and Certain Commercial and Industrial Equipment

Abstract: This rulemaking is to adopt requirements for manufacturers to assure their compliance with energy conservation requirements specifically mandated under the Energy Policy and Conservation Act, as amended, for commercial warm air furnaces and covered commercial heating, air conditioning, and water heating equipment, including furnaces. These requirements include the use of testing and calculation methods for manufacturers to rate the efficiency of their equipment, the role of voluntary independent certification programs in assuring the accuracy of the ratings, and the testing regimen and criteria that DOE would use in enforcement proceedings.

Title: Test Procedures for Electric Motors

Abstract: The Energy Policy Act of 1992 amended the Energy Policy and Conservation Act to direct the Secretary of Energy to prescribe testing requirements and energy conservation standards for those small electric motors for which the Secretary determines that standards would be technologically feasible and economically justified, and would result in significant energy savings. As a result of DOE's analysis, on July 10, 2006 (71 FR 38799), the Secretary published a positive determination for small electric motors, and is now developing test procedures for those motors in this rulemaking. In addition, the Energy Independence and Security Act of 2007 amended the Energy Policy and Conservation Act to expand the scope of covered and regulated electric motors. DOE will be reviewing and amending the test procedures for electric motors to ensure the applicability of the test procedure to the newly covered types, as well as to ensure that DOE is using the appropriate versions of industry standards.

Title: Test Procedures for General Service Fluorescent Lamps, General Service Incandescent Lamps, and Incandescent Reflector Lamps

Abstract: These amendments to test procedures, mandated under the Energy Policy and Conservation Act for fluorescent and incandescent lamps, correct the citations and references to industry standards that are out of date or not longer exist. This rulemaking is being issued concurrently with a parallel rulemaking (RIN 1904-AA92) to amend standards for certain general service fluorescent lamps and incandescent reflector lamps and to consider expanding the scope of standards to cover additional general service fluorescent and incandescent lamps. This rulemaking will ensure that appropriate test procedures are in place to support those standards.

Abstract: The Energy Policy and Conservation Act (EPCA), as amended, establishes initial energy efficiency standard levels for many types of major residential appliances and generally requires DOE to undertake two subsequent rulemakings, at specified times, to determine whether the extant standard for a covered product should be amended. Through this combined

rulemaking, the Department is evaluating potential amendments to update the current energy efficiency standards for residential electric and gas ranges and ovens (including a new provision specific to microwave ovens) and is also considering establishing energy efficiency standards for commercial clothes washers, as required by the Energy Policy Act of 2005, which further amended EPCA. Previously, this rulemaking also included dishwashers and dehumidifiers. Because the Energy Independence Act of 2007 (EISA 2007) prescribed standards for dishwashers and dehumidifiers, they have been removed from the rulemaking.

Title: Federal Procurement of Energy Efficient Products

Abstract: The Energy Policy Act of 2005 amended part 3 of the National Energy Conservation Policy Act by adding section 553, which requires each Federal agency to procure Energy Star or FEMP-designated products in all procurements involving energy-consuming products and systems. In addition, all inventories and listings of products by GSA and DLA must identify and prominently display Energy Star and FEMP-designated products. GSA and DLA are also required to supply only Energy Star and FEMP-designated products in all covered product categories.

Title: Financial Assistance Rules and Procedures for Financial Assistance Appeals

Abstract: The Department of Energy (DOE) is streamlining and simplifying its procedures for soliciting, awarding, and administering its financial assistance agreements. These changes are technical corrections and revisions to sections affected by the Energy Policy Act of 2005, as well as further implementation of the Federal Financial Assistance Management Improvement Act of 1999. DOE is also deleting 10 CFR part 1024, Procedures for Financial Assistance Appeals. These procedures provided for appeals to the DOE Financial Assistance Board, which was abolished. DOE now provides for appeals to the Senior Procurements Executive.

Title: Criteria and Procedures for Determining Eligibility for Access to Classified Matter or Special Nuclear Material

Abstract: This rulemaking will revise 10 CFR 710 to adopt the "concerns" from the Adjudicative Guidelines published pursuant to Executive Order 12968 as the DOE criteria for adjudicating adverse information concerning an access authorization applicant or holder. The criteria will be numbered to correlate with the Adjudicative Guidelines. Other revisions will streamline requirements, tighten time limits, and clarify provisions.

Title: Chronic Beryllium Disease Prevention Program

Abstract: Title 10 CFR 850 "Chronic Beryllium Disease Prevention Program" was issued on December 8, 1999, to reduce the number of workers currently exposed to beryllium in the course of their work at DOE facilities managed by DOE or its contractors; to minimize the levels of, and potential for, exposure to beryllium; and to establish medical surveillance requirements to ensure early detection of the disease. The rule includes monitoring and collecting data on workers' jobs, exposures, and health status. The DOE now has over seven years of job, exposure, and health data, as well as experience implementing the rule, since its full compliance dated of January 7, 2002. The DOE has identified several improvements that will render the rule better aligned to workers' risks, more complete in addressing workers' risks in more types of spaces, and more efficient to implement.

Title: Protective Force Personnel Medical, Physical Fitness, Training, and Access Authorization Standards

Abstract: These amendments ensure that DOE Protective Force (PF) medical and fitness requirements are consistent with the Privacy Act and 10 CFR part 1008, and with policy changes made since the publication of the last version of this rule. The amendments also ensure that PF personnel are evaluated on a case-by-case basis and only on their ability to perform the essential functions of their positions without posing a direct threat to themselves or others, the facility, or the general public. The amendments further ensure that reasonable accommodations are considered before there is a determination that an individual cannot perform the essential functions of a particular position. Finally, the amendments provide new medical review processes that are available to provide for due process should PF personnel be disqualified from medical certification.

Title: Assistance to Foreign Atomic Energy Activities

Abstract: The Department of Energy is amending its regulations at 10 CFR part 810 concerning unclassified assistance to foreign atomic energy activities. These regulations provide that persons subject to the jurisdiction of the United States who engage directly or indirectly in the production of special nuclear material outside the United States must be authorized to do so by the Secretary of Energy.
