Subject Grant Our Clean Cars Waiver (Docket ID No.
EPA-HQ-OAR-2006-0173)

Dear US EPA Secretary Jackson:

It is time to get serious about global warming. California has been leading the country on global warming solutions for years. Our Clean Cars Program is one of the most powerful steps California has taken to stop global warming.

It is high time for the federal government to become our partner in solving global warming. Please grant California's waiver request for our Clean Cars Program. Building cleaner cars is one of the best ways we can solve global warming while also building a stronger, greener economy.

Additionally, making these cars affordable to the average person should be a high priority. I, for example, would love to buy a greener truck but they are priced so high (40K and above) that it's cheaper for me to buy a not-as-green truck. This is a big issue for middle class americans such as myself.

Sincerely,

Amy Frazier
